

2016 Tesla Model X

P90D

Prepared for **Sample Appraisal**

VIN **5YJXCBE28GF004627** | **184,926 miles**

Insurer **Allstate**

Claim No. **000825338998**

Loss Date **April 21, 2026** | Report Date **May 18, 2026**

ACTUAL CASH VALUE

\$19,846

This report was prepared by **Dustin Rees, ASCAA Certified Auto Appraiser**, Fair Auto Appraisals LLC, in accordance with the Uniform Standards of Professional Appraisal Practice (USPAP). It is intended solely for use by the client identified above in connection with the referenced insurance claim. Unauthorized use or reproduction is prohibited.

APPRAISAL SUMMARY

In accordance with your request, the Actual Cash Value (ACV) of the above-referenced **2016 Tesla Model X P90D**, VIN **5YJXCBE28GF004627**, as of the loss incident date of **April 21, 2026** has been determined to be **\$19,846**. This value represents the fair market value of the vehicle immediately prior to the loss and excludes any applicable deductible(s), taxes, title, and licensing fees.

This appraisal was conducted by **Dustin Rees, ASCAA Certified Auto Appraiser**, in accordance with USPAP. The value conclusion is based on an independent analysis of comparable retail market data, adjusted for mileage differentials relative to the subject vehicle. The 5 comparable vehicles identified and analyzed, along with their individual adjusted values and the resulting average, are detailed in the Adjustment Grid section of this report.

The appraiser reviewed all available documentation provided in connection with this claim. These materials were used to verify vehicle identification, equipment, and mileage. The ACV conclusion in this report was independently developed through direct market research and is not derived from or limited by any prior valuation.

PURPOSE, USE AND USER OF APPRAISAL

Purpose

The purpose of this appraisal is to develop an independent opinion of the Actual Cash Value (ACV) of the subject vehicle as of the date of loss. ACV is defined as the fair market value of the vehicle immediately prior to the loss event; that is, the price a willing buyer would pay a willing seller in an arm's-length transaction, with both parties having reasonable knowledge of the relevant facts and neither being under compulsion to buy or sell.

This appraisal does not represent a replacement cost or a retail purchase price. It reflects what a knowledgeable buyer would reasonably pay for the subject vehicle in the open retail market, given its year, make, model, trim, mileage, equipment, and condition as of the date of loss.

Intended Use

The intended use of this appraisal report is to assist the client in evaluating an insurance claim involving the total loss of the subject vehicle. The value conclusion expressed herein is intended to support the client's review and, where appropriate, negotiation of the insurance settlement offered by the insuring party.

This report is not intended for any other purpose, including but not limited to financing, taxation, estate planning, or resale. Any use of this report for purposes other than those stated herein is not authorized by the appraiser.

Intended User

The intended user of this appraisal is the client identified on the cover of this report. No other person or entity is an intended user of this report, and no other party is entitled to rely upon the analyses, opinions, or conclusions contained herein.

Reliance on this report by any party other than the intended user is not authorized by the appraiser. The appraiser is not responsible for unauthorized use of this report or for any conclusions drawn therefrom by unauthorized parties.

SCOPE OF WORK

The scope of work for this assignment was determined by the appraiser to be sufficient to produce credible assignment results in compliance with USPAP. The complexity of the assignment, the needs of the client, and the requirements of the intended use were all considered in determining the appropriate scope. The following steps were undertaken:

Review of Available Documentation

The appraiser reviewed all documentation provided by the client and available through the claim process. This included the insurance company's market valuation report, the original manufacturer's window sticker (Monroney label), and any owner-provided invoices, receipts, or maintenance records. These documents were used to verify vehicle identification, confirm standard and optional equipment, validate reported mileage, and establish a baseline for market research.

The appraiser independently assessed the reliability of these documents and used professional judgment in determining their relevance and weight in the development of the value conclusion.

Market Research and Comparable Selection

The appraiser independently researched the current retail market for comparable vehicles using publicly available listing sources including, but not limited to, Autotrader, CarGurus, and Cars.com. In some cases, the availability of comparable vehicles within the subject's immediate market may be limited. When this occurs, the search radius is expanded to include a broader regional market. This approach ensures that sufficient, relevant comparables are identified while still maintaining reasonable proximity and market similarity to the subject's location.

Comparable vehicles were selected based on similarity of year, make, model, trim, engine, transmission, and drivetrain configuration. All comparable vehicles were identified from active retail listings and reconciled to the date of loss, which is the effective date of value for this appraisal.

Adjustment Analysis

Mileage adjustments were applied to each comparable vehicle to account for odometer differences relative to the subject vehicle. Adjustments were calculated at a specified rate per mile differential, applied as a positive adjustment when the comparable has more miles than the subject, and as a negative adjustment when the comparable has fewer miles.

Value Conclusion

The Actual Cash Value was determined by calculating the arithmetic average of all adjusted comparable values, with each comparable given equal weight. This methodology reflects standard appraisal practice for total loss vehicle valuation and is consistent with USPAP requirements for credible and supportable value conclusions.

SUBJECT VEHICLE

2016 Tesla Model X P90D

VIN: 5YJXCBE28GF004627

MILEAGE	ENGINE	TRANSMISSION
184,926	Dual AC Electric Motors	Automatic 1-Speed
DRIVETRAIN	TRIM	BODY STYLE
AWD	P90D	Sports Utility

Vehicle Description

The subject vehicle is a 2016 Tesla Model X 90D, an electric-powered sport utility vehicle. The powertrain consists of an electric motor paired with an automatic transmission and all-wheel drive configuration, providing dual-motor capability across all four wheels.

The odometer reading is 184,926 miles. The 90D designation indicates this vehicle occupies the mid-tier performance level within the Model X lineup for its model year.

SUBJECT VEHICLE EQUIPMENT INVENTORY

The following is a summary of factory-installed standard and optional equipment present on the subject vehicle as documented by the original manufacturer's window sticker (Monroney label) and available vehicle records.

Notable Standard Equipment

● **AUTOMATIC TRANSMISSION:** 4 Wheel Drive, Power Steering, Power Brakes, Power Windows, Power Locks, Power Mirrors, Power Driver Seat, Power Passenger Seat, Power Trunk/Liftgate, Air Conditioning, Climate Control, Tilt Wheel, Cruise Control, Rear Defogger, Intermittent Wipers, Console/Storage, Memory Package, Navigation System, Keyless Entry, Telescopic Wheel, Message Center, Home Link, Remote Starter, Wood Interior Trim, Bucket Seats, Heated Seats, AM Radio, FM Radio, Stereo, Search/Seek, Steering Wheel Touch Controls, Auxiliary Audio Connection, 20" Or Larger Wheels, Skyview Roof, Air Bag (Driver Only), Passenger Air Bag, Anti-lock Brakes (4), 4-wheel Disc Brakes, Front Side Impact Air Bags, Head/Curtain Air Bags, Backup Camera, Parking Sensors, Rear Side Impact Air Bags, Hands Free, Xenon Or L.E.D. Headlamps, Alarm, Traction Control, Stability Control, Lane Departure Warning, Blind Spot Detection, Dual Mirrors, Heated Mirrors, Tinted Glass, Clearcoat Paint

Factory Options as Equipped

Autopilot (Package 1)	Included
Leather Seats	Included
3rd Row Seat	Included
Intelligent Cruise (Package 1)	Included
Fog Lamps	Included
Metallic Paint	Included

ADJUSTMENT GRID

5 comparable retail market vehicles were selected based on similarity to the subject vehicle in year, make, model, trim, engine, transmission, and drivetrain. Mileage adjustments are applied at a rate of **\$0.04 per mile** differential. The Actual Cash Value is the arithmetic average of the adjusted comparable values.

EXPLANATION OF ADJUSTMENTS

Vehicle equipped with transferable Free Unlimited Supercharging (FUSC), which adds measurable market desirability and value compared to similar vehicles without transferable charging benefits.

Overall ACV Adjustments

The following adjustments were applied to the average of the comparable adjusted values to derive the indicated Actual Cash Value. Each adjustment reflects a specific characteristic of the subject vehicle not otherwise captured by the mileage-adjusted comparable data.

Adjustment	Amount	Basis / Notes
Lifetime Free Supercharging	+\$1,500	

APPRAISER'S CERTIFICATION

I, **Dustin Rees, ASCAA Certified Auto Appraiser**, hereby certify that, to the best of my knowledge and belief:

1. The statements of fact contained in this report are true and correct to the best of my knowledge and belief.
2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
3. I have no present or prospective interest in the vehicle that is the subject of this report, and no personal interest with respect to the parties involved.
4. I have no bias with respect to the subject vehicle or the parties involved in this assignment.
5. My engagement in this assignment was not contingent upon developing or reporting predetermined results.
6. My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
7. My analyses, opinions, and conclusions were developed, and this report was prepared, in conformity with the Uniform Standards of Professional Appraisal Practice (USPAP).
8. I have not performed any services, as an appraiser or in any other capacity, regarding the subject vehicle within the three-year period immediately preceding the date of this assignment.
9. I have not personally inspected the subject vehicle.
10. No one provided significant appraisal assistance to the person signing this certification.
11. I will retain the workfile for a minimum of five years from the date of this report, or at least two years after any judicial proceeding in which I provided testimony related to this assignment, whichever period expires last.

Respectfully Submitted,
